

Introduction to INNER TONAL MOVEMENT

ITM1

INNER TONAL MOVEMENT is one of the most valuable piano playing skills one could develop. It is through this systematic layout of the chord parts providing "movement" adding interest and keeping time in the music that one can only want to reach deeper into this topic. We start out simply so you can understand clearly the principal on how this system works.

- STEP 1: LH SHELL-5th-beats 1 and 3, RH - melody only
- STEP 2: LH SHELL alone and RH insert the 3rd of chord on beat 3
- STEP 3: LH SHELL-5th on beats 1,3 and RH insert the 3rd on beat 4
- STEP 4: LH SHELL alone, RH play 3rd pulsed on each beat 2,3,4
- STEP 5: LH SHELL-5th on beats 2 and 4, RH play 3rd on beat 3
- STEP 6: LH SHELL-5th-7th on beats 2 and 4, RH play 3rd on beat 3

****Create your own list of possibilities using these components making sure you have a "TONE PLAYED EVERY BEAT"**

****Try playing EACH PART for the 4 beats****
****Create your own Combinations**** Using PARTS,
MUST have something played EVERY BEAT 1,2,3,4

(SHELL - 7th - 5th - 3rd)
 Left Left Left Right

Inner Tonal Movement PARTS: SHELL - (7) - (5th) - (3rd)
